

# MEDACT D HBL 0.160.1

## Technical specifications:

|                                                            |            |
|------------------------------------------------------------|------------|
| Stroke Length                                              | 160 – 4 mm |
| Maximum number of pump strokes to reach full stroke length | 20+2       |
| Descent Velocity (load 6 kN, 20°C)                         | 2±1s       |
| Tension Force (lock)                                       | 2,5 kN     |
| Compression Force                                          | 10 kN      |
| Weight                                                     | 3,09 Kg    |
